"EXPRESS" WATER WAGON FEATURES

The fire hose and nozzle quick couples to either side of the "Express" Water Wagon for easy use.

Water flower beds, shrubbery and turf with the optional industrial grade 1/2" hose and trigger gun. Simply attach to the discharge hose bibb and have up to 10 gpm for washing, watering or many other uses.

Another use for the optional 1/2" hose is through the hose bibb on the suction manifold. Gravity flow water to concrete saws and other implements when you simply need a water source to draw from.

The 2" fill hose is equipped with aluminum quick couplers & adapters to easily fill the "Express" from fire hydrants, ponds or water pits.

The "Anti-Siphon" Fill Kit allows the tank to be filled without any possibility of water back-flowing into the municipal supply.
